

Affordable for all Track Launches “Mini” Vacuum Clean & Fill machine for Inkjet cartridge Refilling

Track Engineers, one of the most experienced Refilling Equipment Manufacturers in India have recently launched the Mini version of the Vacuum Fill and Clean Machine. This is yet another marvelous design from Track Engineers for recycling the printer consumables. The machine is specially designed for small refillers who have space constraints and or have low volumes.

The machine uses the proven vacuum fill technology for inkjet cartridge refilling. Use of this device helps in removing the air pockets from foam based cartridges. It helps in even and uniform printing.

The other features of the machine include:

- ❖ Best Suited equipment for **Small** Refill shop, Kiosk, Refill centre.
- ❖ Suitable for
 - HP- 21, 22, 27, 28, 56, 57, 58, 850, 851, 852, 853, 854, 855, 860, 861, 23, 78, 41, 23D (Cartridge with printhead)
 - **New** HP 801, 702, 818, 900, 901
 - **New** Business inkjet HP 10, 11, 13, 18, 88
 - Canon BC 01, 02, BC 20, Canon Pixma 40, 41, 50, 51, 830, 831,
 - Lexmark 16, 17, 26, 27, 50, 60, 70, 80
- ❖ Very easy to maintain.
- ❖ Cleaning/Emptying station with set of 18 cleaning fixtures
- ❖ Works on 230 V A/c. Plug in and start operation.
- ❖ Versatile design backed by 20 years of experience.
- ❖ Attractively Priced
