

## Track Engineers Releases another version of **Vacuum Fill and Clean Machine**

*Mumbai, India, 18 October, 2008*

Track Engineers, one of the most experienced Refilling Equipment Manufacturers in India have recently launched the new version of the Vacuum Fill and Clean Machine. This is yet another marvelous invention from the Track Engineers for recycling the printer consumables. The 'easy to use' machine uses the proven vacuum fill technology for inkjet cartridge refilling. Use of this device helps in removing the air pockets from foam based cartridges. It helps in even and uniform printing. This is one of the best machines for POS applications.

**Model No TEUV6C 02**
